LANDLEDGER / DBMS TRAINING

Fictional document upload

Use with the manual data-entry practice dataset.

Purpose of this attachment

This file is a sample digital attachment for testing the Documents module.

It can be uploaded to the fictional records in the accompanying guide.

It does not describe or certify any real property, person or transaction.

Practice sequence:

1. Save the document metadata in the web app.
2. Open that document and upload this PDF.
3. Confirm that its filename, size and checksum appear.
4. Select the matching reviewing sub-registrar and verify the document.
5. Return to the transaction and check the approval prerequisites.

The same PDF may be reused for this student demonstration. In a real registry, each record requires its own authentic and relevant evidence.

TRAINING ONLY - NOT A LEGAL DOCUMENT

Not a deed, government certificate, identity proof or ownership evidence.

Verification in the project app demonstrates a software workflow only.
